

OreIQ Business Summary

Overview

OreIQ is an AI-powered intelligence platform dedicated exclusively to **junior mining companies**. The platform synthesizes proven investment principles from legends like **Rick Rule**, **Don Durrett**, and **Jacques Bonneau**, along with insights from other seasoned mining experts.

Our AI processes vast amounts of technical, financial, and operational data while continuously monitoring market sentiment across forums and online communities. This delivers clear, actionable insights to help investors identify high-potential opportunities while managing the extreme risks in the junior mining sector.

Core Value Proposition

- Combines deep domain expertise from multiple mining veterans with advanced AI.
- Cuts through promotional hype with reality-based analysis.
- Focuses on geological potential, management quality, capital structure, project derisking, and real-time sentiment.
- Issues warnings when the junior mining market becomes **overhyped** or **over-hated**.
- Delivers timely **Buy & Sell alerts** based on sentiment extremes and fundamental catalysts.

Key Data Sources

- NI 43-101 Technical Reports
- Drill results and resource estimates
- Press releases and news flow
- Investor presentations
- Feasibility studies (PEA, PFS, FS)
- Metallurgy and recovery test work
- Permitting and regulatory updates
- Earnings reports and financial health
- Insider filings and ownership changes
- Management track record
- Junior mining forums and online investor sentiment

Core Features

- AI Project Evaluator (geological potential & derisking)
- Management & Capital Analysis
- News & Sentiment Engine
- Market Sentiment Monitor (Overhyped / Over-hated warnings)
- Drill Result Interpreter
- Permitting & Metallurgy Tracker
- Risk & Valuation Model (Rick Rule-style)
- Intelligent Alert System (Buy & Sell alerts)
- Fully Explainable AI with evidence and confidence levels

Target Audience

Retail investors, resource-focused funds, family offices, and mining professionals seeking asymmetric opportunities in precious metals, base metals, and critical minerals.

Differentiation

OrelQ delivers disciplined, expert-informed analysis — combining real project merit, management integrity, and sentiment-driven market timing signals.

OrelQ Pricing Strategy

Model: Tiered SaaS Subscription (Monthly & Annual billing, with Annual offering 20% discount)

Tier	Price (Monthly)	Price (Annual)	Target User	Key Features
Free	\$0	\$0	Beginners & trial users	Limited stock lookups, basic sentiment, 3 alerts/month
Explorer	\$49	\$470	Retail junior mining investors	Full AI reports, drill analysis, sentiment monitor, 20 alerts/month
Pro	\$99	\$950	Serious investors & small funds	Everything + Buy/Sell alerts, portfolio tracking, priority support, unlimited alerts
Enterprise	\$299+	Custom	Family offices, small hedge funds, analysts	Custom models, API access, team seats, dedicated sentiment dashboards, white-label option

Additional Revenue Streams:

- One-time report fees (\$199–\$499 for deep-dive custom analyses)
- Affiliate / referral commissions from brokers
- Data licensing (to funds or media)

Strategy Notes:

- Start with aggressive pricing to gain early traction in the niche junior mining community.
- Focus on **high perceived value** — users in this space are willing to pay for specialized edge (especially Buy/Sell alerts and overhyped/over-hated warnings).
- Annual plans encouraged to improve cash flow and retention.
- Freemium model for organic growth via mining forums.
